A software developer passionate about delivering amazing user experiences. Experience building end-to-end web applications across multiple programming stacks. Eager to leverage strong professional skills gained through 10 years in healthcare with growing software skills to impact technical teams.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS **Frameworks/Libraries:** Express, React JS **Databases:** MongoDB **Version Control:** Git, Github

TECHNICAL EXPERIENCE

Github User Search App

[Source Code](#)

[Live Demo](#)

Frontend Mentor challenge - Project consists of React and SASS/SCSS. The goal is to build the project and have it look as close as possible to the original and use the github API to fetch user's data

- Use CSS/SCSS to delivery interactive and responsive design for both desktop and mobile using grid and flexbox
- Utilizing React hooks such as useState to store and manipulate data and pass data via props, useEffect to manage side effects when props change
- Make API calls using the fetch() function to pull user's data for display
- Added light/dark mode using CSS and react props for better user experience

Interactive Pricing Component

[Source Code](#)

[Live Demo](#)

Frontend Mentor challenge - Project consists of HTML/SCSS/JS. The goal is to build the project and have it look as close as possible to the original. Interactive range pricing should display the correct price before and after discount

- Interactive and responsive design is achieved by writing SCSS code and used both flexbox and grid for layout
- Change pricing before and after discount is from Vanilla JavaScript by manipulation the DOM

Tip Calculator

[Source Code](#)

[Live Demo](#)

Frontend Mentor challenge - Project consists of React and SCSS/SASS. The goal is to build the project and have it look as close as possible to the original. User should be able to calculate tip base on given percentage of tip or custom input by user and calculate tip per person and total price per person

- Manage multiple states using React Hooks and useEffect to manage side effects when states change via props
- Interactive, and responsiveness using SCSS using BEM classes naming convention
- Leveraged built in synthetic events such as onClick and onChange as user interact with the elements

EXPERIENCE

Frontend Mentor Challenges

[Frontend Mentor](#)

On Going

- Completed multiple (12+) front-end challenges ranging from newbie to junior
- Participating in providing feedback to the community by commenting on other participants solutions
- Increase front-end skills using HTML, CSS, and JS as well as using Framework such as React, and SCSS/SASS

Udemy Courses

- SASS - The Complete SASS Course by Code and Create by Lasha Nozadze and George Lomidze
- The Complete JavaScript Course by Jonas Schmedtmann
- Advance CSS and SASS: Flexbox and Grid by Jonas Schmedtmann

EDUCATION

Coding Dojo | Full-Stack Developer Certificate

Bellevue, WA | 2021

- Immersive Full-Stack Training Program in Python, Java and MERN

UW, Seattle | BA in Interdisciplinary Visual Art

Seattle, WA | 2012

- Architecture drawing and design and contemporary designs
