A software developer passionate about delivering amazing user experiences. Experience building end-to-end web applications across multiple programming stacks. Eager to leverage strong professional skills gained through 10 years in healthcare with growing software skills to impact technical teams.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, Python, Java **Frameworks/Libraries:** Express, React JS, Bootstrap, Springboot **Databases:** MongoDB **Version Control:** Git, Github

TECHNICAL EXPERIENCE

Echo Valley Family Farm || Volunteer Full Stack Developer [GitHub Demo](#)

An e-commerce website for Echo Valley Family Farm, a local olericulture farm. Site improved digital marketing of products and services and enabled customers to more easily review and purchase products.

- Built an end-to-end full-stack website by collaborating with clients to identify features requests and site requirements, and project scope to successfully deliver a functional MVP.
- Constructed highly secure user authentications utilizing Express Middleware and Mongoose Object Data Modeling to manage the relationship between datas
- Leveraged third-party package Axios to make API calls from the server and programmatically utilize react hooks to manage and persist data through the use of reusable components for readability, scalability and performance optimization.
- Use HTML and CSS to deliver responsive UI design across all devices using flexbox, grid, and animation using transition and transform properties to provide feedback and accessibility for better users experience
- Streamlined a payment gateway through integration of third-party API (Stripe and Paypal) enabling a secure, cost-effective, and enriched user experience

Sweet Movies || Boot Camp Group Project (Front-end) [GitHub Demo](#)

As part of Boot Camp graduation requirements, students are split into groups for a collaborative project. Sweet Movies is a full-stack application which allows users to create, view, update and delete movies.

- Built a full-stack application by collaborating with two other group members for all possible features and how to achieve project end goals given a short duration of time.
- Built simple user authentications utilizing Express and Mongoose Object Data Modeling as well as using third-party package Axios to communicate with the server API using react hooks for data storing
- Adapted SASS for better organization and readability of CSS styling
- Delivered responsive design and user flow using advanced CSS properties for smoother user experience

PROFESSIONAL EXPERIENCE

Mercury Pharmacy Services - Lead Data Entry Pharmacy Technician

2012-present

- Manage multiple accounts in Long Term Care Nursing Facilities including Skilled, Assisted Livings and Adult Family Homes to ensure daily and monthly prescriptions are entered and delivered by communicating, attending conference calls and meetings
- Effectively communicated with doctors, nurses, and other healthcare providers to obtain prior-authorizations, refills authorizations including controlled substances CII-CV
- Superuser during pharmacy new software implementations and owned the training over 10 new data entry technicians - effectively onboarded technicians across software integration between pharmacy and nursing facilities.
- Led quality assurance initiatives to troubleshoot and mitigate errors at the pharmacy and or nursing facilities to accurately maintain medication and billing.
- Maintained highest privacy protocols to ensure sensitive patient profiles and medical records are up to date in case of state audit

EDUCATION

Coding Dojo | Full-Stack Developer Certificate

- Immersive Full-Stack Training Program in Python, Java and MERN

Bellevue, WA | 2021

EDCC, Edmonds | Pharmacy Technician Certification

Edmonds, WA | 2015

UW, Seattle | BA in Interdisciplinary Visual Art

- Architecture drawing and design and contemporary designs

Seattle, WA | 2012
